

AURUMONE

# Product & Pricing Guide

AurumOne ERP & Aurum Catalog — everything a jewellery shop owner needs to know before choosing a plan.

## What is AurumOne?

AurumOne is two products working together, built exclusively for the jewellery trade:

**AurumOne ERP** — the desktop system of record for your shop: billing, inventory, Girvi (pledge lending), purchases, accounting, GST and reports. Runs fully offline on your own PC; no internet dependency for daily use.

**Aurum Catalog** — a mobile app for iPad and Android: a digital showroom for customers, plus "My Stock," a standalone mini-ERP for shops that want a stock register on the phone with no desktop system at all. Can run completely standalone, or link to an AurumOne ERP Silver+ licence as Full Companion.

## AurumOne ERP — Silver, Gold, Diamond

One-time licence fee plus an annual maintenance contract (AMC) — the traditional model for desktop business software.

|                        | Silver              | Gold                            | Diamond                          |
|------------------------|---------------------|---------------------------------|----------------------------------|
| Billing & purchase     | Full                | + Credit sales, exchange-linked | + Negotiation assistant          |
| Girvi (pledge lending) | —                   | Full, automatic interest        | + Smart renewal alerts           |
| CRM & follow-ups       | —                   | Full timeline & notifications   | + Auto daily actions             |
| Accounting             | Daybook & day-close | + Full P&L, balance sheet       | + Multi-branch (roadmap)         |
| Intelligence           | —                   | —                               | Negotiation Assist, risk scoring |
| Support                | Standard            | Standard                        | Priority same-day                |

## Aurum Catalog — Basic, Pro, Advanced, Full Companion

Billed as a recurring subscription, monthly or yearly. Basic/Pro/Advanced are depths of the "My Stock" module within the standalone Catalog Only plan — not separate products. Full Companion links Advanced-depth Catalog Only to an AurumOne ERP Silver+ licence.

|                       | Basic | Pro         | Advanced | Full Companion |
|-----------------------|-------|-------------|----------|----------------|
| Add/edit/remove stock | Yes   | Yes         | Yes      | Yes            |
| Bulk import           | —     | Yes         | Yes      | Yes            |
| Tag printing          | —     | Single item | Batch    | Batch          |

|                           |       |       |       |       |
|---------------------------|-------|-------|-------|-------|
| CSV export/backup         | —     | —     | Yes   | Yes   |
| ERP-linked Shop Inventory | —     | —     | —     | Yes   |
| Repair Module             | —     | —     | —     | Yes   |
| Devices included          | 2     | 2     | 4     | 3     |
| Real sale / billing       | Never | Never | Never | Never |

**The one rule that never moves, on any plan:** My Stock can change an item's status from In Stock to Sold. It never captures a price, records a payment, or generates an invoice — a real sale always happens in the AurumOne ERP.
